ONE DAY COURSE & OPEN BOOK WRITTEN EXAM

NOTE: Laser Science and Safety Certificate is issued on successful completion this course and written exam

Aims of this course:

To inform and evaluate knowledge gained from this course as a pre-requisite to establishing, a medical or cosmetic laser/IPL clinic and to provide employed staff that will perform laser or IPL treatments with the essential underpinning science of laser and non-laser phototherapy, and the critical factors that govern successful treatment application and safe use of such devices.

INCORPORATES APPROVED LASER SAFETY CERTIFICATE COURSE: Approved by Department of Radiation Health and Western Australian Radiological Council and Queensland Radiation Health Department.

Persons using Laser and IPL equipment or employed to demonstrate, install and repair these devices may require a LICENCE to do so in some states of Australia.

This course has been approved by Australian Radiation Health Authorities as a pre-requisite before issuing a Laser User License and for gaining professional indemnity/malpractice insurance by insurance providers.

COURSE CONTENT:

- Phototherapy Principles and Laser Science
- Tissue Interactions of Thermal Laser and IPL Treatments
- Biological and Biochemical Effects of Non-Thermal Laser
- Efficient Treatment Principles using Thermal Laser and IPL Devices
- Comply with Australian Standards for Safe Operation of Laser and IPL
